

What Medicaid Cuts Mean for Montana

Medicaid is a Lifeline in Montana

Medicaid plays a critical role in Montana, supporting the health of children, older adults, people with disabilities and hardworking families — while also providing critical access to care through hospitals, nursing homes and rural providers statewide.

Where Montana's Medicaid Funding Comes From

 Medicaid Population¹
238,000

 Federal Medicaid Contribution²
\$1.9 Billion

 State Medicaid Contribution³
\$500 Million

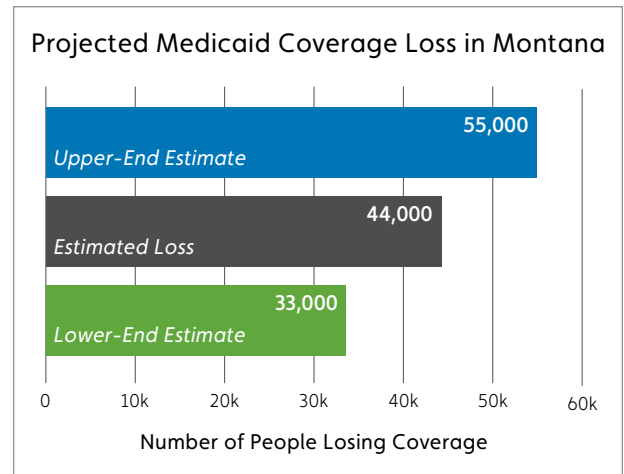

What's at Stake

The proposed Medicaid cuts outlined in H.R. 1 would strip health coverage away from Montana residents and force significant economic trade-offs, leaving taxpayers footing the bill to cover funding gaps.

The combination of cuts included in the bill would **reduce federal Medicaid funding to Montana by 15%**, totaling roughly **\$3 billion over the next decade**.⁴

Projected Medicaid Coverage Loss in Montana⁵

If Congress enacts the proposed Medicaid cuts, up to **55,000 Montanans** could lose coverage. Even under the most conservative estimate, **over 33,000 people** would be pushed out of the program as a result of eligibility restrictions, administrative red tape and reduced funding for outreach and enrollment efforts.

Estimated Economic Impact of Medicaid Work Requirements in Montana⁶

Work requirements would limit Medicaid eligibility and result in a reduction in economic activity, shrink the workforce and undercut state and local tax revenues.

 **State GDP Loss:**
\$169.6M – \$243.3M

 **State & Local Tax Revenue Loss:**
\$12.2M – \$17.5M

 **Total Jobs Lost:**
1,500 – 2,200

Congress must protect Medicaid to keep Montana families healthy and the state economy strong.
